## WAVE CURTAINS SYSTEMS

- I sistemi per tende Mottura, sia con azionamento a corde che a strappo, sono adatti per tende ad arricciatura continua ad onda. L'arricciatura continua della tenda è realizzata per mezzo di una corda distanziatrice all'interno del canale di scorrimento degli scivoli.
- Mottura systems, either cord drawn and hand drawn are suitable for continuous wave draping. Continuous curtain draping is achieved by means of a spacer cord inside the channel along which the sliders run.
